7 of 8 review helpful Tells you just what you need to know By Douglas Mckenzie This book is excellent for the
person who simply wants to expand their ability to use Excel without becoming a VBA expert Most books on VBA

seem to be written for computer professionals who for example seem to want to know about every data type that can be handled before learning anything else Most of us would rather just learn how to do th This handbook helps students learn to use Visual Basic for Applications VBA a programming environment within Microsoft Office as a means to automate methods and models and create special applications With VBA sophisticated management science techniques work behind a simple and nice interface Gaining valuable experience students will develop applications that are user friendly and tailored to a specific problem while the number crunching takes place behind the About the Author S Christian Albright received his B S degree in mathematics from Stanford in 1968 and his Ph D in operations research from Stanford in 1972 Since then he has been teaching in the Operations and Decision Technologies Department in the Kelley
