By Saqib Sabih : Network Security and ISP Setup Implementation: volume 1 external networks must be carefully considered as part of the overall security strategy of the local network a router may include a firewall vpn handling and other contents overview what is dns maliciously abusing implementation flaws in dns protections for spoofing detecting and preventing dns attacks using cisco products and Network Security and ISP Setup Implementation: volume 1:

Three people can keep a secret only if two of them are dead Benjamin Franklin Quotes such as these are very common

Keeping secret is not an easy task In fact it is a human nature to share secrets to every other person It is often said that to make something public it should be called a secret In early days of computing 1950s 60s no importance was given on security because the systems in those days were closed In simple terms computers exchange data and infor
