2 of 2 review helpful Disappointing By Larry Boeldt A Press has generally been a good publisher of technical books

The ability to download sample code and attain low cost PDF versions of the book were two of my favorite features of A Press books I have ordered in the past On top of those nice amenities the books I have ordered on C NET MVC and SQL Server have all been top notch and kept me on the leading edge of devel Microsoft is injecting new energy into the smart phone marketplace with the sophisticated Windows Phone 7 This new energy equates to new opportunities for you the mobile developer Beginning Windows Phone 7 Development has been written specifically to help you seize these opportunities and begin creating applications for this exciting new mobile device platform Beginning Windows Phone 7 Development starts with the basics walking you through About the Author Henry Lee founder of ToeTapz com and NewAgeSolution net is passionate about technology He works with various Fortune 500 companies delivering mobile applications and rich Internet applications He is focusing his energy on delivering mobile
