By Jan Salvador van der Ven, Jan Bosch : Agile Software Architecture: Chapter 5. Architecture Decisions: Who, How, and When? agile software development describes a set of values and principles for software development under which requirements and solutions evolve through the collaborative 5 thoughts on roles on dad teams chloe august 2 2014 at 956 am good day i know this is somewhat off topic but i was wondering if you knew where i could Agile Software Architecture: Chapter 5. Architecture Decisions: Who, How, and When?:

The way in which architectural decisions are made changes when more agile development methods are used This chapter focuses on architectural decisions and how they are made in industrial settings From our literature research and experience we have constructed three axes on which the architectural decision process of projects or companies

can be projected We evaluate this framework with five industrial case studies in which we have participated In all of the cases t
