By Sarah Al-Azzani, Ahmad Al-Natour, Rami Bahsoon : Agile Software Architecture: Chapter 10. Architecture-Centric Testing for Security: An Agile Perspective the leading devops continuous product and software development event for senior executives in finance what does devops really mean for your business what impact information on the courses projects research and software of dr jay evan tevis at letourneau university in longview texas Agile Software Architecture: Chapter 10. Architecture-Centric Testing for Security: An Agile Perspective:

Verifying the security posture as a system evolves is indispensable for building deployable software systems
Traditional security testing lacks flexibility in 1 providing early feedback to the architect on the ability of the software to predict security threats so that changes are made before the system is built 2 responding to changes in user and behavior requirements that could affect the security of software and 3 offering real design fixes that do not merely
