By Michael Stal : Agile Software Architecture: Chapter 3. Refactoring Software Architectures a common agile practice is to perform some high level architectural modeling early in the project to help foster agreement regarding your mike beedle is the founder and ceo of e architects inc a consulting company that specializes in application development using distributed objects and internet Agile Software Architecture: Chapter 3. Refactoring Software Architectures:

This chapter describes how to systematically prevent software architecture erosion by applying refactoring techniques Software architecture modifications are common rather than the exception in software development Modifications

come in different flavors such as redefining or adding requirements changing infrastructure and technology or causing changes by bugs and incorrect decisions But no matter where these changes originate they need special attention from soft
